

Last Rays, New Routines

This edition brings together ideas, updates
and options designed to support everyday
work life, simply, reliably and with care.

Supporting Everyday Life at Work

Every working day is shaped by **small moments**
— a **coffee break** between meetings, a healthy
snack to **recharge**, or colleagues **catching up** in
the kitchen.

As teams return from summer holidays and
routines begin again, **we're here to help**
workplaces stay stocked with fresh fruit,
bakery favourites, snacks and drinks that
keep everyone energised, all season long.

Awards & Recognitions:

As summer winds down and workplaces become busier again, office kitchens naturally evolve too.

Lighter refreshments remain popular on warmer days, while comforting breakfasts, fresh bakery items and nourishing snacks begin taking centre stage. **It's the perfect time to refresh your workplace offering for the season ahead.**

What we're seeing in office kitchens

From **deliveries and restocking** to client conversations and usage data, we see firsthand **how food and refreshment support teams throughout the working day.**

Shared options bring teams together

Fruit boxes and shareable snacks are **consistently the most used items**, encouraging informal connection across teams.

Choice matters: clarity matters more

Kitchens that offer a clear **mix of everyday favourites** and **better for you** options see higher engagement and less waste.

Consistency builds trust

Teams notice when kitchens are **reliably stocked**. Predictable availability matters more than constant novelty.

Close

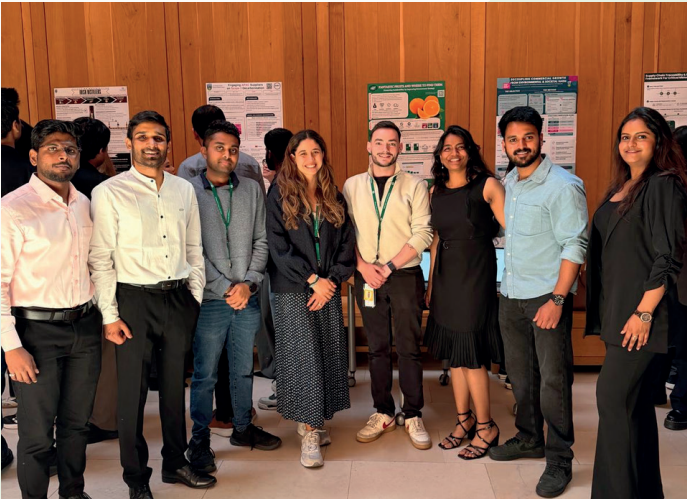

These insights guide how we design our services, **select products** and support our clients, shaping **better workdays in practical ways.**

Sustainability, safety & trust

Sustainability is embedded in how we operate, from **responsible sourcing and waste reduction** to the decisions we make across our supply chain.

Our **EcoVadis Bronze Sustainability Rating**, high food safety standards and commitment to supporting local producers continue to underpin our approach. In 2026, we’re building on these foundations through practical initiatives focused on **waste recovery, collaboration and more sustainable supplier practices**.

Recycling & Recovery

From January to April 2026, **2.3 tonnes of biodegradable food waste** from The Fruit People was diverted from landfill and processed through anaerobic digestion.

This resulted in:

Growing Better Together

For the **second year running**, we’re working with Master’s students from UCD’s sustainability programme, giving students practical experience while bringing fresh perspectives into our business.

This year’s project focused on **more sustainable practices across our supplier network**, helping us explore how we can make a meaningful impact beyond our own operations.

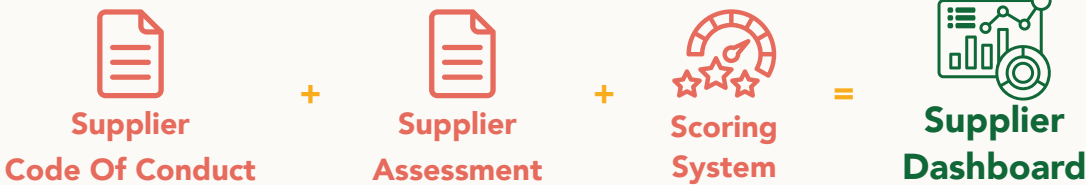

Strengthening Our Supply Chain

We’re taking a more structured approach to supplier sustainability, using the **VSME standard** to help shape our Supplier Code of Conduct and assessment process.

A supplier scoring system and dashboard help us assess performance, support better decision-making and identify opportunities to **continuously improve together**.

Approach and Implementation

After thorough academic research, using international standards like VSME, a supplier code of conduct was **structured using 20 criteria which was later simplified to 6:**

A **supplier dashboard** is built to help with decision making:

OUR FAN FAVOURITES^{!!}

These are the workplace favourites our customers return to time and time again.

Whether you're stocking a busy office kitchen or looking for an easy way to boost team morale, these tried-and-tested boxes continue to deliver the perfect balance of freshness, variety and convenience.
